PROOF

PROOF Workshop at CERN, 29-30.11.2007
http://root.cern.ch/root/PROOF2007/

- xrootd not user friendly
  POSIX interface(s) under development

- effort needed in bookkeeping

- PROOF Data Sets not yet 100% usable

- interesting experiences reported by other groups and experiments

  - users' experience on CAF and at GSI
  - rather common problems
  - ATLAS: also optimization of hardware configuration wrt performance
    (as here, e.g. n. of cores per disk, etc)

News at GSI

1 New results from **speed tests**, also on lustre

  see forum.gsi.de, computing, Meeting December 5 (soon available)

2 Serious problems with **file transfers from CERN**
   - Only 30% of files arrived
   - Work on-going (Fabrizio Furano)
   - Preparations for next week (AliESDs, AliESDfriends, part of raw)

3 We need to organize well the information about **data available at GSI**:
   - Wiki page as central place
   - lists properly formatted
   - description of data types
