Summary of Federico Antinori's talk on
TRIGGER MENU
in Alice Physics Forum on 2-04-2008

- **procedure of adding new triggers (fast track for basic ones)**

- **dead times: TPC,TRD,TOF 1 ms; SPD 0.3 ms; muon 0.5 ms
TPC max rate?**

- **LHC plan: single beam, two one-bunch beams, 43-156 bunches**

- **trigger mix in the LHC commissioning runs**

  single beam　　　　**beam-gas**

  one-bunch　　　　**bunch-crossing, MB, muon, high mult**

  multi-bunch　　　　**same + 2 muon, PHOS, ... + past-future protection**
