Subject: Re: missing ROOT libraries Posted by Mohammad Al-Turany on Thu, 21 Jan 2010 16:24:41 GMT View Forum Message <> Reply to Message

Hi Olaf,

First of all EvtGen is not part of PandaRoot or fair external packages, So may be it would be even better to remove it from pandaroot svn and put it somewhere else.

I never understood why it need SQL? in fact it does not but the the library is linked there in the config.mk, so please remove it from there! if you are using g77 then that is it, otherwise you have to remove also the libg2c and replace it with libgfortran.

cheers,

Mohammad
