Dear all,

I created a "feb10" release of pandaroot, which can be obtained from svn:

svn co https://subversion.gsi.de/fairroot/pandaroot/release/feb10

which is a snapshot of the latest /stable release (=rev. 7803)

The next major release is scheduled on 01.05.2010. I will regularly update the stable branch prior to the next release.

Note that there are still some QA macros not running on all the platforms. For that, I would like to ask the developers to keep an eye on the dashboard and try to fix these asap.

Greetings,

Johan.
