Hi Gianluigi,

what exactly do you propose as a strategy to reject outliers? Please remember that so far we do not have a smoother for our Kalman filter.

A request such as this seems reasonable, but I am not sure, it should be made to our group. There are two coordinators for tracking. We are not the only ones who can contribute to track fitting.

However, as I said we have such plans. But it is just a technical student on the task. So, there is no time estimate of guarantee that it will work. That is all the manpower we have for this in the moment.

Cheers, Christian
