What do you mean? Did you try ...

svn co <https://subversion.gsi.de/fairroot/fairsoft/release/jan10> ?

Or do you have another problem? If so, could you tell which problem?

I asked Mohammad and Florian to fix the tarball on the website as well...

UPDATE 05/03/2010, 19:51.... tarball has been updated by Mohammad.

Johan
