Thanks, Mohammad!!

No, we didn't update anything anymore since the /feb10 release (which is even more stable than the /stable). Too many changes because of the collaboration meeting, almost every day. Too dangerous before DPG.

(we just tried the to compile /trunk in order to find out if the dpm with mode 1 and mode 2 is also crashing in the /trunk, and not only in the /feb10 and in the /stable).

cheers, Soeren
