Hallo everyone,

the documentation page about GEANE on the Wiki has been restyled and updated. You can find it here:

<http://panda-wiki.gsi.de/cgi-bin/view/Computing/GeaneInterface>

It provides the documentation and the howto run GEANE.

I would ask anyone who will look into it to please tell me about any error, problem, broken link you may found in it, so that I can fix it. Moreover if you have requests of missing items please tell me and I will manage to add them.

I hope it will be useful

Best regards,
Lia.
