Dear Manoj,

EvtGen is a headache since the success of its compilation and building depends strongly on the system and compilers you are using. In particular, it is often found complicated to build it on newer systems using gfortran. There are however some tricks and installation tips, which you can find and read on

<http://panda-wiki.gsi.de/cgi-bin/view/Computing/WebHome?topic=EvtGen>

I would suggest to follow the steps indicated on this Wiki.

Greetings,

Johan.
