Johan Messchendorp wrote on Sat, 20 March 2010 21:57Hi,

Shall I try to "isolate" a messy event with cause a timeout and give you the root files?

Johan.

hi,
tomorrow I will run the DA STT macros and see if they give me the same problem on a SL4.8
Linux machine in Pavia.
Let's see if I can isolate myself the problem and understand if it is a problem of the real p.r. or a
problem of in the generation of the events
