Subject: small redesign of EMC mapper (rev. 8162)
Posted by Dima Melnychuk on Wed, 24 Mar 2010 13:24:30 GMT

Hi all,

I made small redesign of EMC mapper. All the modifications are internal and interface is left unchanged.

Main idea was to implement all the possible mappings not in single "if-else", but as subclasses of PndEmcMapper. It should simplify possible extension. And as a result different subclasses of PndEmcMapper are instantiated depending on the mapper version. So it's something motivated by Factory Design Pattern.

Best regards,

Dima
