Hi Johan,

thanks for noticing. I am aware of that. That is not an incompatibility. We will make a small change to GeaneTrackRep2 in the near future. But actually GeaneTrackRep2 is not really used in PANDArOOT, so it isn't very important. PANDArOOT uses GeanTrackRep mostly. The other version was written by me to distribute to other projects as it does not depend on any Fair classes.

LSLTrackRep is outdated and is not currently used in PANDArOOT (as far as I know). But the old version is compatible with the new GENFIT release as well.

Cheers, Christian
