Subject: Re: One question about tracking efficiency Posted by StefanoSpataro on Wed, 21 Apr 2010 17:36:51 GMT View Forum Message <> Reply to Message

Do you have maybe a plot of the phase space coverage (i.e. MC_p vs MC_theta) separated for all the particle types? Maybe there is one particle which is always going in the forward spectrometer and that we are missing, or maybe at low momenta.
