hello,

When I run runLumiSim.C, FAIRGeom was missing in lumisim.root, which gave error while running runLumiDrawGeo.C.

I read some discussion on similar topic at link
<http://forum.gsi.de/index.php?t=msg&th=2582&start=0&rid=93&S=8a415fbc32c8b125305ad77d67d51b4e>
but I couldn't understand the proper solution.

What should I do to fix the error? Please help me in this regards.

With Regards,
