Hello all ,

I installed pandaroot trunk in my system, after running pandaroot/macro/lumi/runLumiSim.C I faced following error

```
.....  
dlopen error: /home/manoj/panda/pandaroot/buildPanda/lib/libPid.so: undefined symbol:  
_ZN20PndVtxFitterParticleD1Ev  
Load Error: Failed to load Dynamic link library  
/home/manoj/panda/pandaroot/buildPanda/lib/libPid.so  
.....
```

please give me any idea to fix this error.

with regards,
