Subject: Re: Problem with Root geometrys from CAD
Posted by Christian Hammann on Tue, 18 May 2010 09:27:24 GMT

Dear Tobias,

I just tried to use the CadConverter to create TGeoTraps, by disabling the TGeoArb8 like you discribed. Unfortunately it did not work, the TGeoTrap is not correct. For expample the length of the crystal is only 10 cm instead of 20 cm.

Cheers
Christian
