I was not informed that my code was changed without notice...

However, try to edit your gconfig/rootlogon.C and invert the two lines:

```
if(isLibrary("libPid"))gSystem->Load("libPid");  
if(isLibrary("libAnalysisTools"))gSystem->Load("libAnalysisTools");
```

in

```
if(isLibrary("libAnalysisTools"))gSystem->Load("libAnalysisTools");  
if(isLibrary("libPid"))gSystem->Load("libPid");
```

and tell me if it works. If it does, tomorrow I will commit the change in the code...
