Subject: Re: Problem with Root geometrys from CAD Posted by Christian Hammann on Fri, 06 Aug 2010 11:45:53 GMT View Forum Message <> Reply to Message

Hi all

I have still have not been able to find a solution for this problem. However as it seems to be working with geant3 I have committed the code for the proto60 to svn, rev. 9625, along with a geometry for the proto60. At the moment only the crystals are included, no alveoles etc.

The geometry uses geometry version 18, mapperversion 10, module 7.

Regards

Christian
