Hi Lia and everybody,

very nice. I can confirm your results. For a simulation with 1e3 primary pions@100MeV/c pt from vertex (0,0,0)

I have 2627 tracks in the output.

By the way the track reconstruction (1e3 events,ideal track finding, helix fit, Genfit) took 35min. on a 3GHz core.

329 have a PndTrack Flag < 0. 204 have -1 and 125 have -2.

Have a nice weekend, too.

greetings

David
