Subject: Re: Lhe Tracking: Kalman Task with STT, worse results Posted by David Pohl on Mon, 06 Dec 2010 10:32:38 GMT View Forum Message <> Reply to Message

Hallo Stefano,

thank you for your response. I used the ideal track finder. Now I am confused. That means that I already checked the Kalman response independently from LHE? Idependently from LHE means without Lhe track finding? Or why do you suggest do use the ideal track finder?

I am also interested in the talks reporting this. Can you send me some links where to find them or name the panda meeting where they have been presented? Thank you in advance.
