Gianluigi Boca wrote on Mon, 06 December 2010 23:26hallo,
you can find in the new directory

`$VMCWORKDIR/macro/sttmvdtracking`

three macros for generating, digitizing and reconstructing events.

In particular in `runreco.C` you can find the Task for Pattenr Recognition with Mvd + Stt

In short time `runreco.C` will be expanded to include also the Kalman filter track fitting.

Please try it and report any problems you may encounter

Gianluigi

I uploaded a new veriosn of the same
`$VMCWORKDIR/macro/sttmvdtracking/runreco.C`
with also the Kalman filter.

Also Lia provided the Macro
`$VMCWORKDIR/macro/sttmvdtracking/checkmomentum.C`
to plot the reconstructed momentum after the Pattern Recognition but BEFORE the
reconstructed momentum after the Kalman filter.

Gianluigi
