Hi all,

I encountered a problem during the digitization. When running my digi.C I get the following error:

```
Error: Symbol #include is not defined in current scope X3872_digi.C:147:
Error: Symbol exception is not defined in current scope X3872_digi.C:147:
Syntax Error: #include <exception> X3872_digi.C:147:
Error: Symbol G__exception is not defined in current scope X3872_digi.C:147:
Error: type G__exception not defined
FILE:/home/webert/Documents/Diplomarbeit/X3872_tpc_noFT/./X3872_digi.C LINE:147
(int)0
*** Interpreter error recovered ***
```

By comenting I found out that it arises because of the PndTpcElectronicsTask.
I am using a fresh installation of PandaRoot(rev. 10456) and the ext. packages from january.

Best Regards,
Tobias
