Dear all,

On upcoming Wednesday, we will have our next pandaroot meeting. At the usual time (10:00) and place (EVO). Tentative topics:

- 1) General announcements
- 2) Open forum and user analysis issues
- 3) Tracking issues
 - PndTrackCand:
 - *) usage of PndDectectorList and STT;
 - *) step 2: removal seeds in PndTrackCand
 - Kalman optimization for electrons
 - Forward tracking (I hope the experts on this can join!)
 - *) ideal track finding?
 - *) plans for real-track finding?

4) crashes in TPC code....

5) A.O.B.

Greetings,

Stefano & Johan.
