Hello all,

I am trying to install pandaroot on mac 10.6.3 but after make it is giving fallowing error,

```
make[2]: *** [lib/libDpmEvtGen.0.0.0.so] Error 1
```

```
make[1]: *** [pgenerators/DpmEvtGen/CMakeFiles/DpmEvtGen.dir/all] Error 2
```

```
make: *** [all] Error 2
```

so I did make in DpmEvtGen

it is giving following error

```
ManojJadhav:DpmEvtGen Manoj$ make
```

```
Compiling file common.f ...
```

```
make: g77: No such file or directory
```

```
make: *** [tmp/common.o] Error 1
```

I tried with coping above file to DpmEvtGen but this is not working, so please some one can suggest me any solution?
