Dear Sir

Thank you for a VERY prompt response.

I tried svn update from /fairsoft/tools directory, the log is as follows.

```
svn: warning: Error handling externals definition for 'root':  
svn: warning: Server sent unexpected return value (400 Bad Request) in response to  
OPTIONS request for 'http://root.cern.ch/svn/root/tags/v5-28-00'  
At revision 10979.
```

Now what to do?
