Subject: Re: How about a 'Linux Support' Forum ?
Posted by Christopher Huhn on Thu, 11 Nov 2004 16:56:48 GMT

I think it's worth a try creating fora concerning IT infrastructure at GSI.

Shall we have a category called "IT Infrastructure"?
And which fora would you suggest?

I agree that a "Linux support" is a good candidate for a forum but IMHO an additional forum for general discussion about the linux installation would be a good idea (for requests/organization of new services aso.)
