Hi,

I have checked `pandaroot/macro/sttmvdtracking/runPreliminaryMvdReco.C`, but this has only the `PndMvdClusterTask`, which is already present in the `digi` macro. Probably I have missed something...

However, I have created a folder on `macro/run/tdrct`, for the macros for the central tracked TDR. We will run them on the GRID.

At present I have simply copied the macros from `dc4`.

I would ask the tracking developers to modify directly them to add all your changes in the task list, so that at least we start to know what we should run.

Regards.
