Subject: Re: Error and warning in geometry of MDT and DRC Posted by Maria Patsyuk on Sun, 01 May 2011 10:09:41 GMT View Forum Message <> Reply to Message

As far as I know the warnings that you get are harmless - they just inform you that Optical Surfaces work only with Geant4 and are ignored if you run the simulations using Geant3. The DIRC geometry and optical photons propagation are not affected by switching between Genat3 and Geant4.
