Hi Elisa,

Quote:I read e-248. Is it not strange? The other value are e-17.

yes, that' s should not happen...

I still do not see the crash in my events, but I was able to force it just putting as starting values the ones from your log (thank you for posting it). Now I should be able to see directly what is the problem and (hopefully) fix it.

Stay tuned,

Lia.
