first mom = (0.077671,-0.047670,0.000000)
first pos = (16.552964,0.397360,0.000000)
last mom = (-0.085107,-0.032588,0.000000)

has last pos = (14.075058,-26.674008,-4.163533)...
Gianluigi, this comes from your PR, do you have any idea?
Ciao,
Lia.

I put in Svn a fix to a particular situation arising in the Pattern Recognition when a track doesn't have any Stt Skew Hits nor Mvd hits associated.
I am not sure, but that may be the cause of the crash observed by Elisa.

So please update PndSttMvdTracking.cxx and .h and try again
Gianluigi
