Stefano Spataro wrote on Fri, 13 May 2011 21:11The 19 has no forward calorimeter.considering that we are not going to use it,that is consuming memory and it occupies disk space it is taken out.

There is version 17 with root version of fsc "emc_module5_fsc.root". Is it also consuming memory? I have not noticed that.

Moreover versions with emc_modulexx5.dat is obsolete.
