Subject: TPC geometry fixed Posted by Felix Boehmer on Wed, 25 May 2011 14:13:41 GMT View Forum Message <> Reply to Message

Dear fellow PANDA enthusiasts,

I checked in a new version of the TPC geometry (new file! V1.1), the run\_sim\_tpccombi.C using the new version, and the correct generation macro. Please feel free to run a few tests... I ran the whole "tdr chain" myself, seeing no crashes or other problems.

Thanks again to Mohammad for helping with the geo!

Cheers

Felix
