Hi,
which is the proper way to run DIRC geometry?
I am using the old good standard:

```
PndDrc *Drc = new PndDrc("DIRC", kTRUE);  
Drc->SetRunCherenkov(kFALSE); // for fast sim Cherenkov -> kFALSE  
fRun->AddModule(Drc);
```

But it is not working, it produces the following messages:

```
=====  
Warning in <TGeant3TGeo::DefineOpSurface>: Called for surface MirrSurface. Not applicable  
in Geant3 - setting is ignored.  
Warning in <TGeant3TGeo::SetBorderSurface>: Called for border surface BarMirrSurface. Not  
applicable in Geant3 - setting is ignored.  
Warning in <TGeant3TGeo::SetBorderSurface>: Called for border surface BarMirrSurface. Not  
applicable in Geant3 - setting is ignored.  
Warning in <TGeant3TGeo::SetBorderSurface>: Called for border surface BarMirrSurface. Not  
applicable in Geant3 - setting is ignored.  
Warning in <TGeant3TGeo::SetBorderSurface>: Called for border surface BarMirrSurface. Not  
applicable in Geant3 - setting is ignored.  
Warning in <TGeant3TGeo::SetBorderSurface>: Called for border surface BarMirrSurface. Not  
applicable in Geant3 - setting is ignored.  
Warning in <TGeant3TGeo::SetMaterialProperty>: Called for material surface MirrSurface.  
Not applicable in Geant3 - setting is ignored.  
=====  
-I- Initializing PndSdsDetector()
```

```
*****
```

```
PndEmc::SetSpecialPhysicsCuts():  
using special physics cuts ...
```

```
*****
```

```
-I- Initializing PndGemDetector()  
-I- PndDrc: Initialization started...  
-I- PndDrc: Switching OFF Cherenkov Propagation  
Volld: Volume DrcBarSensor not found  
bar 1 id = 0  
Volld: Volume DrcPDSensor not found  
Volld: Volume DrcBarBox not found  
Volld: Volume DrcEV not found  
-I- PndDrc: Initialization successfull
```

but in the TGeoManager I can see there is no DIRC!!
Which is the correct way to call it? I do not need the cherenkov propagation, the fast option is
what I need to use.

Many thanks in advance.
