Subject: Mvd Hits bug still there Posted by Gianluigi Boca on Fri, 27 May 2011 10:53:44 GMT View Forum Message <> Reply to Message

yesterday I updated all the pandaroot code but nevertheles the Mvd bug is still there.

I still have Mvd hits from PndTrackCand produced by the Riemann algorithm that hade HitID =-1 and DetID = -1.

Since Ralph has turned off the noise production in the Mvd for the moment I suppose the cause is only the Riemann Pattern Recognition code

Gianluigi
