Subject: Re: TPC digitization for more than 1000 events
Posted by StefanoSpataro on Fri, 27 May 2011 12:40:56 GMT

This problem in tpc digitization is known since several months. It depends mainly on the machine you are using. With my SL4s I could not run more than 2000 events, with my new machine I can run 10k events without problems.
