Hi Dima,

```
#5 0x00007f3c8379730f in FairGeanePro::PropagateFromPlane (  
    this=0x1000000000000000, v1=  
0x7fff8ab90990, v2=  
0x7fff8ab90960)  
    at /d/panda02/dmelnich/pandaroot/pandaroot/geane/FairGeanePro.cxx:384
```

Here GEANE just sets up the starting plane so it would be useful to see which numbers are given as input to PropagateFromPlane, just to see if they identify well a plane or not.

Lia.
