Dear Alicia,
I add string: add_subdirectory (ftof)
to file pandaroot/CMakeLists.txt (copy of trunk from svn) attached,
then:
cd pandaroot/buildPanda
make clean
cmake ../
. ./config.sh
make

then I add some lines to pandaroot/tutorials/charmonium/jul10/run_sim_tpccombi.C:

```
FairDetector *FTof = new PndFtof("FTOF",kTRUE);  
FTof->SetGeometryFileName("ftofwall.root");  
fRun->AddModule(FTof);
```

and to pandaroot/tutorials/charmonium/jul10/run_digi_tpccombi.C (attached):

```
// ----- FTOF hit producers -----  
PndFTofHitProducerIdeal* tofhit = new PndFTofHitProducerIdeal();  
tofhit->SetVerbose(iVerbose);  
fRun->AddTask(tofhit);
```

then run it:
root -b run_sim_tpccombi.C

but stil the result is:

Processing run_sim_tpccombi.C...

PSaid instance created... access via gSaid->f()

```
[INFO ] Media file used : /u/naryshk/ver1/pandaroot/geometry/media_pnd.geo  
Info in (PndGeoHandling::Instance): Making a new instance using the framework.  
fgeoName3 /u/naryshk/ver1/pandaroot/geometry/emc_module4_StraightGeo24.4.root  
-l container name PndEmcGeoPar  
Error: Symbol PndFtof is not defined in current scope run_sim_tpccombi.C:79:  
Error: type PndFtof not defined  
FILE:/u/naryshk/ver1/pandaroot/tutorials/charmonium/jul10/./run_sim_tpccombi.C LINE:79  
*** Interpreter error recovered ***
```

Best Regards, Yuri.
