Hi,

launching some Geant4 simulations have noticed the following message:

Adding SpecialPhysicsList stepLimiter+specialCuts+

Visualization Manager instantiating with verbosity "warnings (3)"...

Geant4 has been created.

-l g4Config() using g4conf macro: /home/spataro/may11/pandaroot/gconfig/g4config.in

\*\*\*\*\* COMMAND NOT FOUND </random/SetSeeds 1309865603 1309865603 > \*\*\*\*\*

SetCuts Macro: Setting Processes..

SetCuts Macro: Setting cuts..

++++ TG4Warning: +++++

    TG4G3CutVector::CheckCutValue:

    PPCUTM cut value 1 MeV is lower than 2\*e<sub>mass</sub>.

    The cut will be ignored.

+++++

I suppose something has changed with the new G4 version, that should be fixed in the code.
