Subject: Random seed in Geant4?
Posted by StefanoSpataro on Tue, 05 Jul 2011 11:39:05 GMT

Hi,
launching some Geant4 simulations have noticed the following message:

Adding SpecialPhysicsList stepLimiter+specialCuts+
Visualization Manager instantiating with verbosity "warnings (3)"...
Geant4 has been created.
 -I g4Config() using g4conf macro: /home/spataro/may11/pandaroot/gconfig/g4config.in
***** COMMAND NOT FOUND </random/SetSeeds 1309865603 1309865603 > *****
SetCuts Macro: Setting Processes..
SetCuts Macro: Setting cuts..
++++ TG4Warning: ++++
   TG4G3CutVector::CheckCutValue:
   PPCUTM cut value 1 MeV is lower than 2*e_mass.
   The cut will be ignored.
+++++++++++++++++++++

I suppose something has changed with the new G4 version, that should be fixed in the code.
