Hi Johannes,

I've redone the eta\_c reconstruction with updated code but still without updated padplane file.

And results are worse then before.

Using ideal pid in PndTpcRiemannTrackingTask I still have as before 0 reconstructed eta\_c with 1000 events statistics.

But using kaon hypothesis efficiency decreased from 8.3% to 3.7%.

So I hope it is related to wrong padplane file and I will rerun digitiation/reconstruction now.

Dima
