Hello everybody,

I would like to say that I'm running, for pi+pi- analysis, the reconstruction macro for the TPC, available into svn (update of pandaroot done this morning),
(macro/run/tdrct/npipi/run_reco_tpc_evt.C)

and I have al lot of this message:

in line: 305 in file:

/home/fioravanti/fairsoft/pandaroot/GenfitTools/trackrep/GeaneTrackRep/GeaneTrackRep.cxx

with fatal flag 0

GFException thrown with excString:

GEANE propagation failed

best,

Elisa
