Hello everybody,

I would like to say that I'm running, for pi+pi- analysis, the reconstruction macro for the TPC, available into svn (update of pandaroot done this morning),  
(macro/run/tdrct/npipi/run\_reco\_tpc\_evt.C)

and I have al lot of this message:

in line: 305 in file:

/home/fioravanti/fairsoft/pandaroot/GenfitTools/trackrep/GeaneTrackRep/GeaneTrackRep.cxx  
with fatal flag 0

GException thrown with excString:  
GEANE propagation failed

best,  
Elisa
