Dear Gridka users,

I couldn't make kill my submit jobs.

Yesterday I sent some jobs, and went quite smooth for few first jobs.

Then next sets of submit jobs are not going to finish.

That are not completed, and cannot be killed.

From the alien I have done already

>masterJob IDs kill

But in MonALISA those jobs are still activating.

How can it be? There are no indication like zombie in the monitoring.

Owner is dkang and here are corresponding problematic IDs.
