Dear Gridka users,

Actually user has a permission only 60 subjobs.

Yesterday I have seen that submit can go over the top value, i.e., more 60 Jobs. It was happened for me.

Normally alien decide to reject submission for outranging of 60.

But a large number of CPU was assigned to me at yesterday, after that I got the crash for rest of my subjobs without success or completed.

Cheers,  
Donghee
