Dear Gridka users,

Actually user has a permission only 60 subjobs. Yesterday I have seen that submit can go over the top value, i.e., more 60 Jobs. It was happended for me.

Normally alien decide to reject submission for outranging of 60. But a large number of CPU was assigned to me at yesterday, after that I got the crash for rest of my subjobs without success or completed.

Cheers, Donghee
