Subject: Re: Run 951 GRID -TPC Posted by Felix Boehmer on Wed, 03 Aug 2011 15:51:05 GMT View Forum Message <> Reply to Message

Hi Elisa,

we just took a look at the 2pion example for the npipi macros. From 100 simulated events we see 76 reconstructed entries in the invariant mass spectrum peaking at roughly 3.1 GeV, which is reasonable. All has been done with the macros from the trunk revision 12933.

Cheers

Felix
