Dear all,

A new set of DPM runs at three energies for STT and TPC has just started on the GRID using the july11 and august releases, respectively. The macros have been modified to match those used in the signal MC. More details can be found at

<http://panda-wiki.gsi.de/cgi-bin/view/Computing/TDR11>

(see bg runs 1000-2002)

Johan.
