Hi stefano,

Sorry I forget some comment for this study.

I do not finalize this study, and this is purely and absolutely study. Main purpose of this study is not related TDR project in some sense at least in my side. I wanted to know how good vertex fitter for long distance track. I was wondering that vertex fitter can use for secondary decay with very large decay angle. I wanted to clarify that.

That is working, wonderful!

Have a nice evening! Donghee
