Hi,

i have some silly problem.

I exceeded my disk quota (for example to see with `fquota_list`), so i deleted all my files, my user folder (`/panda/user/p/pitka`) is now totaly empty and it still states i use to much disk space.

I guess i did some error in my jdl files and some simulated data is saved at some strange place blocking everything.

Anybody has an easy solution to this?

Thanks a lot in advance

Andreas
