Hello,

well, actually i dont know where the problem is
your qoute atm is
[0062.] pitka 1689/100000   91276.4947/186316.9022

the output of your jobs is not very big..

oh i guess i found out where the problem is!
it is in your jdl
you should change the output from

Outputdir="/panda/user/p/pitka/data/$1";
to
Outputdir="/panda/user/p/pitka/data/#alien_counter#";
or
Output = { "std*, *.root" , "myArchive:*.root" } ;
to
Output = { "std*, *.root" , "myArchive_$2-$3:*.root" } ;
// or something with #alien_counter# in the name if you use the very same directory
you get a Error_SV cause the myArchive file already exist in the outputdirectory and it is not
possible to create/upload a file which already exists

cheers,
rene
